DETAILED ACTION

Claims 7-30 and 32-35 are pending in this application.

Request for Continued Examination (RCE)

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 24, 2002 has been entered.

Action Summary

2. Examiner acknowledges the addition of claims 32-35 in the application.
3. The rejection of claims 7-30 under 35 U.S.C. 103(a) over Kovacs et al. is being maintained for reasons stated in the previous office actions dated January 27, 2000 and October 2, 2000.

Response to Arguments

4. Applicant's arguments filed June 24, 2002 have been fully considered but they are not persuasive.

Applicants argue that Kovacs neither teaches nor suggest coating iron particles with an inert material and then combining the microencapsulated particles into a lipid carrier. It is the position of the examiner that column 2, lines 17-65, discloses bead-like forms of iron compounds which are dispersed into a solid fat carrier and subsequently added to a food product. It is the position of the examiner that the claim does not

mention whether the food is heated prior to eating. The claims are drawn to dispensing the iron granules onto food prior to consumption; this could imply that the food is either cold or heated up.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 32-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kovacs et al. (US 3,992,556).

See office action dated January 27, 2000 for the rejection.

Conclusion

6. Claims 7-30 and 32-35 stand rejected.
